Engineered Solutions, Lasting Partnerships

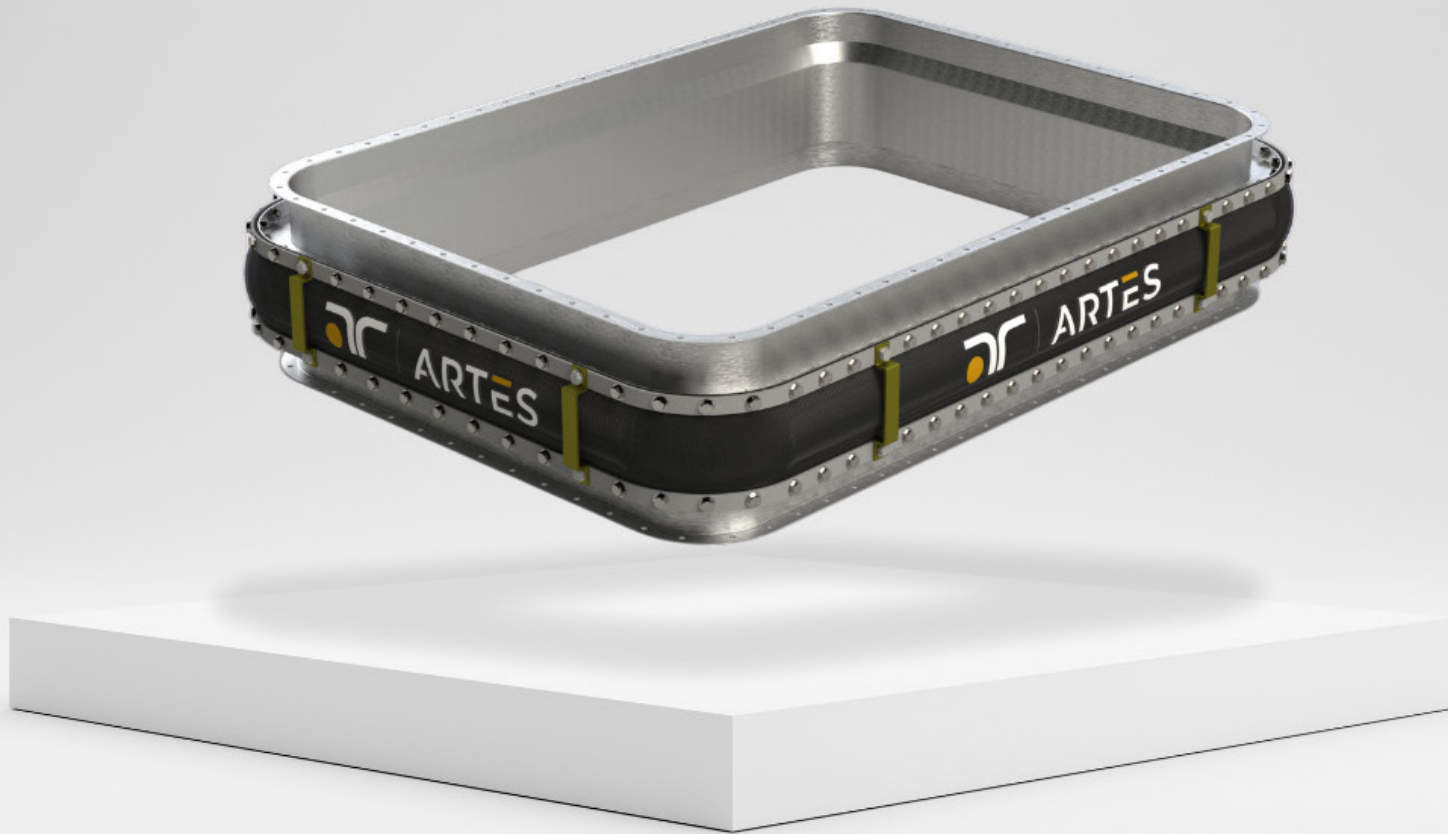

WE ARE

A Canadian owned and operated company with over 50 years of business history and impeccable record in Customer Service.

ARTES has partnered with several internationally reputed Manufacturers of fluid control products.

Industrial manufacturer and distributor
of fluid control products since 1967.

est. 1967

MISSION

To deliver innovative and reliable engineered solutions that enhance the efficiency and sustainability of our clients' operations, while maintaining the highest standards of quality and customer service.

VISION

To be a global leader in specialized engineered solutions, recognized for our technological advancements, exceptional customer service, and commitment to sustainable practices.

Our Core Values

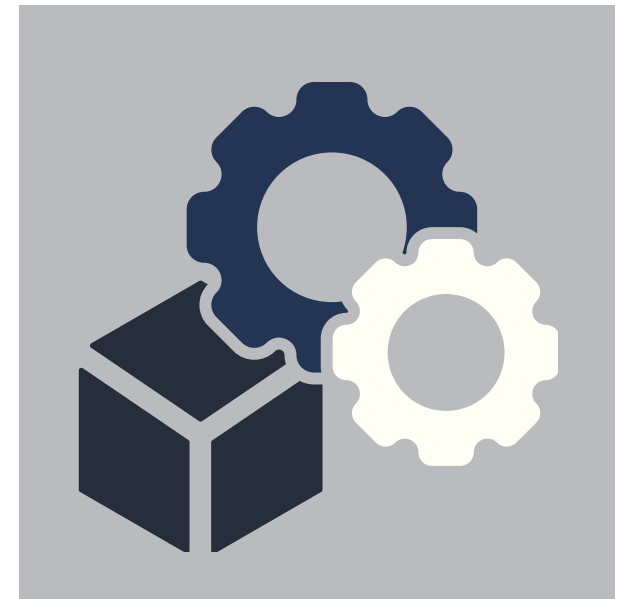

Strategic Partnership

We endorse collective action, leadership and commitment.

**Innovative and Reliable Engineered
Solutions for Optimum Efficiency, Safety,
and Sustainability.**

Product Development

We act with integrity, reliability and safety.

Proactive Solutions

We provide proactive and prioritized support.

We are committed to delivering unparalleled, customized solutions that elevate the efficiency and sustainability of your operations.

Operational Excellence

We innovate with dedication and endurance

Recognized for our technological advancements and unwavering dedication to customer service, we set the standard for excellence and quality in the industry.

Technical Services

Dedicated to upholding the highest standards of quality, customer service, and safety.

Hose Services

On-Site or In-House

We offer pressure testing services both on-site and in-house, adhering to industry-standard guidelines.

Pre-Test Inspection and Reporting

A thorough visual inspection is conducted before every hydro-test.

Certified Technicians

All tests are performed by ARTES Inc. certified technicians.

Valve Automation

Factory Approved Repair

Using certified parts and following stringent OEM standards, our technicians deliver repairs that maintain the integrity and reliability of your system.

Reconditioning & Testing

Thoroughly inspect, refurbish, and test each component to ensure that your equipment meets or exceeds industry standards.

Actuator Services

Comprehensive actuator services support the full lifecycle of your valve automation systems.

Machining

Custom Manufacturing

We offer custom manufacturing services, including in-house machining up to 25.5" OD, with 130 standard profiles.

Material Options

We work with thermal plastics, rubber, and metal materials.

Production & Prototyping

We provide full production manufacturing, prototyping, engineering material qualifications,

On-Site Services

Equipment Inspection

We offer pressure testing services both on-site and in-house, adhering to industry-standard guidelines.

Base Inspection

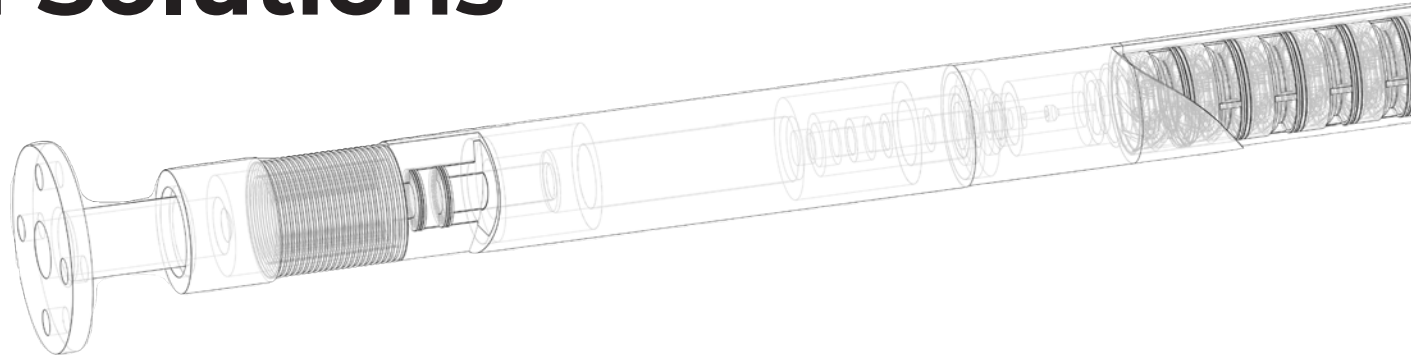

A thorough visual inspection is conducted before every hydro-test.

Consultation & Reporting

We consult with site staff and provide a follow-up document package outlining our findings.

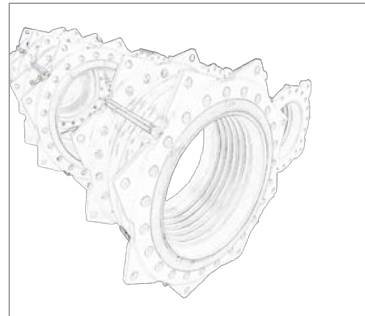

Engineered Solutions

Product Design

- Local Engineering
- Design for Movement
- Hose, Expansion Joints
- Compensator Bellows

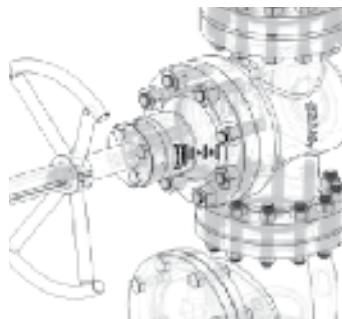

Application Engineering

- Professionally and Technically Certified
- In-House PMI, LPI, Failure analysis and metallographic polishing

Product Development

- Manufacturing Equipment Design
- Prototype Test Equipment Design
- Prototype Testing

Process Control Systems

- System Design and Integration
- Advanced Calibration and Testing
- Remote Monitoring and Support

A large, detailed photograph of several industrial flange components, likely for a turbine or compressor, arranged in a row. The flanges are made of a light-colored metal and feature multiple bolt holes around their perimeters. They are resting on a wooden surface.

Tailored engineering solutions designed to meet the unique needs of your industry.

Expertise in system design, product development, and advanced testing ensures exceptional performance and reliability for every project.

**From Concept to
Implementation.**

Valves

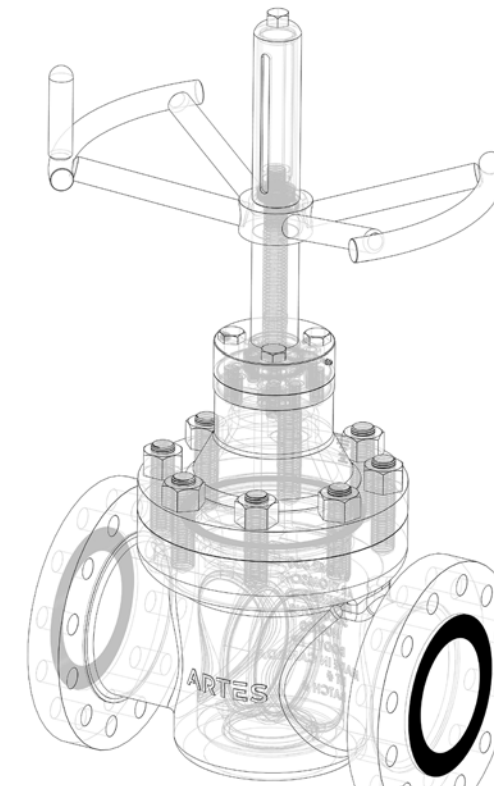

Optimal Function and Service Life.

Highest Level of Reliability, Durability and Integrity.

Built with cutting-edge technology and materials, they ensure smooth operation and longevity, supporting your operations with unwavering dependability.

ARTES places the highest priority on quality and product excellence.

- Actuated Valves
- Manual Valves
- Specialty Valves
- Valves Accessories

Air Valves

Butterfly Valves

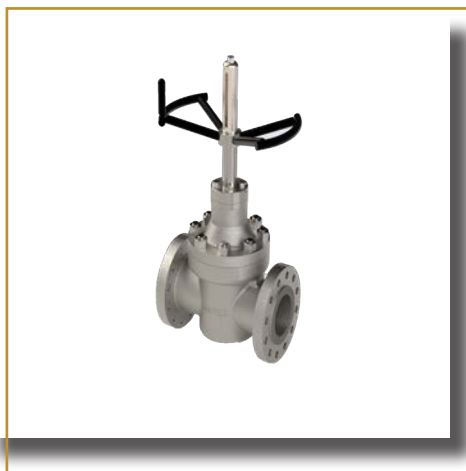

Ball Valves

Check Valves

Gate Valves

TXT-300 Valve

Expansion Joints

Engineered for Reliability and Flexibility.

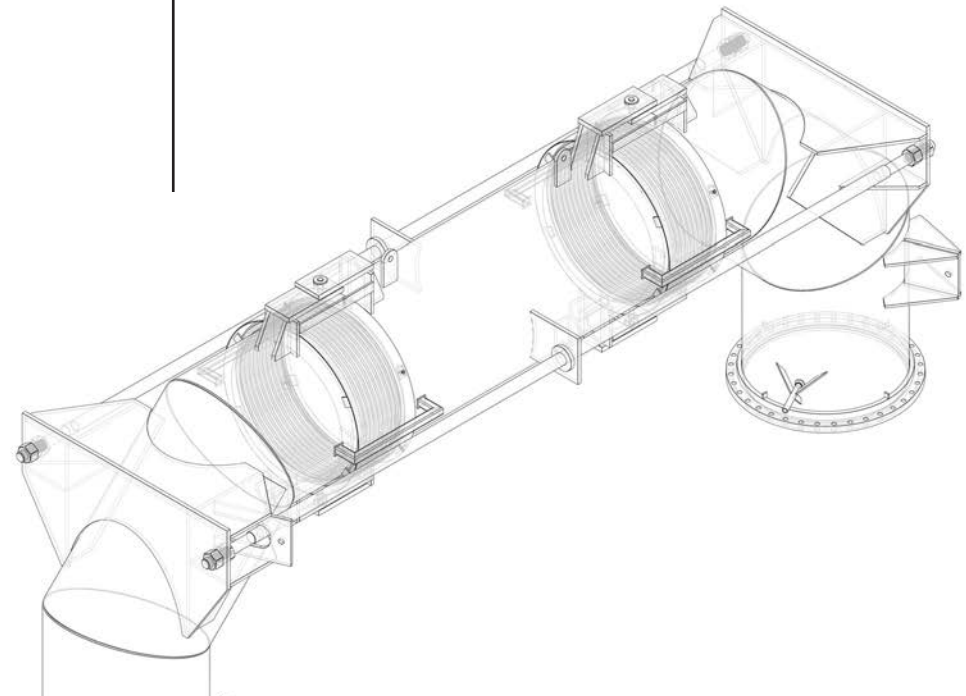

Innovation and Durability

Designed to absorb movement and reduce stress, our expansion joints ensure peak performance in a wide range of applications.

Crafted from advanced materials and engineered for long-lasting service, they provide seamless operation and support your systems with unparalleled dependability.

ARTES places the highest priority on quality and product excellence.

- Composite Fabric
- Metallic
- Industrial Rubber
- PTFE

Outer Diameter
Compensators

Rubber Expansion Joints

Universal Expansion Joints

Pressure Balanced
Expansion Joints

Fabric Expansion Joints

HVAC Products

Hose

Innovative Hose Solutions for Various Applications.

Unmatched Durability Flexibility

Our hose products are expertly crafted to meet the demanding requirements of industries such as oilfield, chemical processing, and manufacturing.

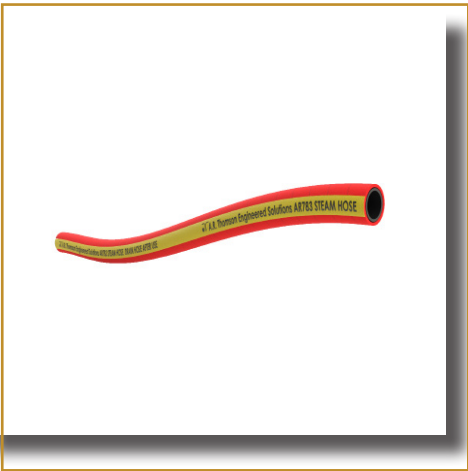

Built with advanced materials and precision engineering, our hoses provide long-lasting durability, flexibility, and reliable performance for your specific applications.

ARTES places the highest priority on quality and product excellence.

- Composite Fabric
- Metallic
- Industrial Rubber
- PTFE

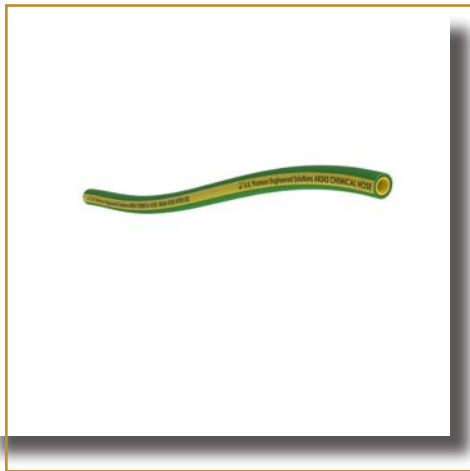

Steam Hose

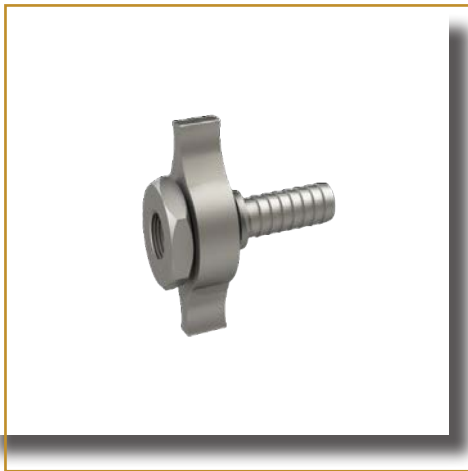

Air Hose

Chemical Hose

Fittings

Metal Braided Hose

End Connections

Specialty Sealing

Innovative Sealing Solutions for Specialized Needs.

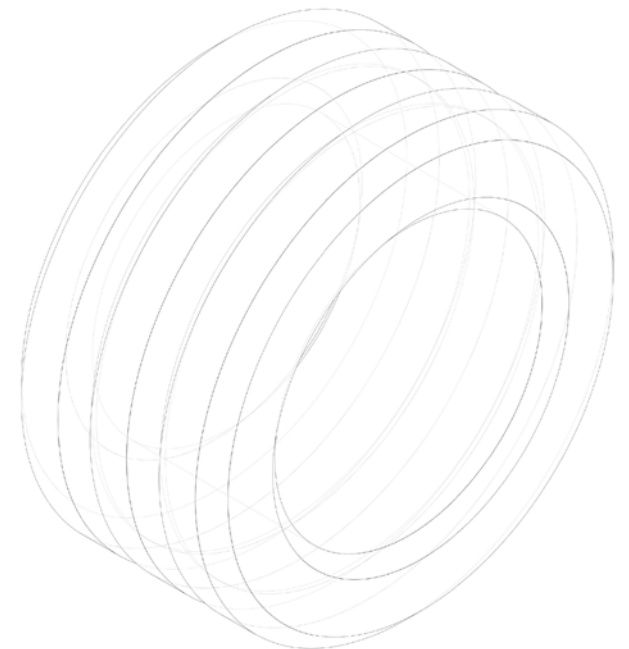

Unmatched Sealing Performance

Our range of products, including oilfield sealing, rubber molding, and custom machining, is designed to meet the most challenging sealing requirements.

Using cutting-edge materials and precision engineering, we ensure long-lasting performance and tailored solutions to fit your unique applications.

ARTES places the highest priority on quality and product excellence.

- Oilfield Sealing
- Rubber Molding
- Sealing Solutions
- Machining

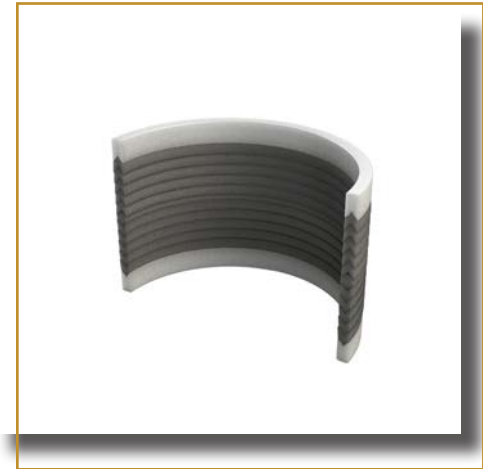

Bearings

Lantern Rings

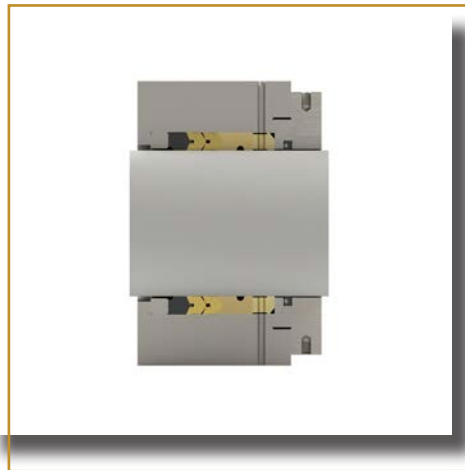

Locator Seal Assemblies

BOP Multiline Duals

Packing Assemblies

Plunger Seals

Pumps + Pump Parts

Engineered for Reliability and Efficiency.

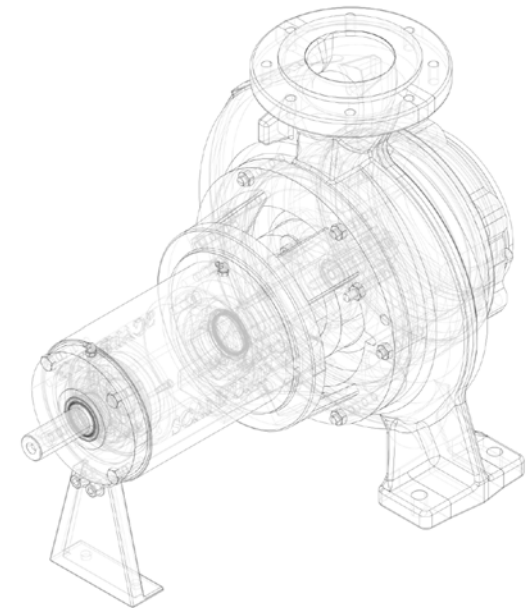

Unmatched Durability

Whether for ballast, bilge or general fluid transfer, our pumps deliver durability and performance.

Built with cutting-edge technology and materials, they ensure smooth operation and longevity, supporting your operations with unwavering dependability.

ARTES places the highest priority on quality and product excellence.

- Centrifugal Pumps
- Fire Systems
- Magnetic Driven Pumps
- Vertical Pumps

Vertical and Sump Pumps

Gear Pumps

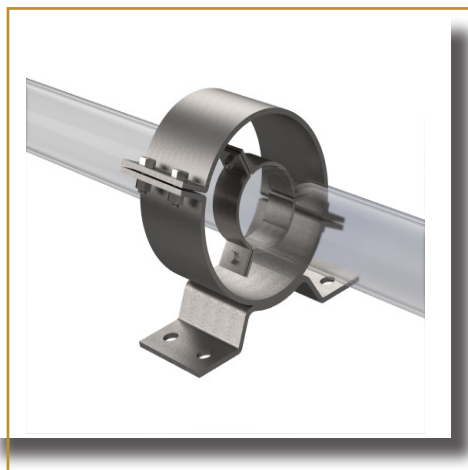

Fire Systems

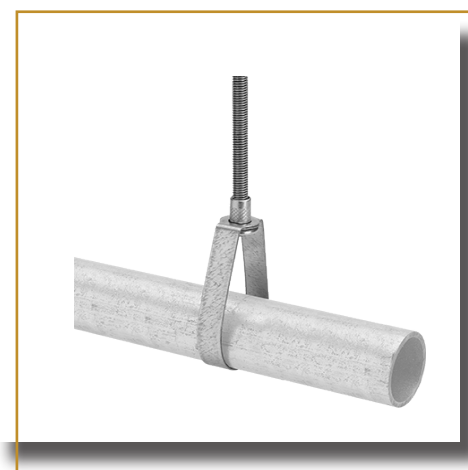

Centrifugal Pumps

Pipe Shoes and Guides

Pipe Supports

Process Instrumentation

Supplying world leading instrumentation products.

Efficiency, Safety, and Precision

Our extensive range of instrumentation products are built to meet the demands of a variety of industries such as, oil and gas, chemical processing, mining, pulp & paper, food & beverage, among others.

Our products cover a broad-spectrum of instruments such as pressure sensors, flow meters, level devices, thermal solutions, and various forms of control and automation products.

ARTES places the highest priority on quality and product excellence.

- Analytical Products
- Process Controls
- Process Heating
- Valves & Actuation Products

Actuators & Regulators

Measurement

Monitors & Meters

Guages

Transmitters

Indicators & Control Panels

Steam Systems

Peak Efficiency and Extended Service Life.

Engineered for Innovation and Durability

Crafted with state-of-the-art technology and high-quality materials, these systems ensure smooth, long-lasting operation, providing consistent and dependable performance for your critical operations

ARTES places the highest priority on quality and product excellence.

- Automated Pump Tramp Units
- Condensate Recovery
- Steam Traps
- Steam Trap & Energy

Energy

Pioneering Technologies for a Cleaner Future

Leading Energy Solutions

Our energy products are designed to reduce environmental impact and enhance operational efficiency.

We utilize technology to address the challenges of energy transition, providing durable and effective solutions for a cleaner, more sustainable future.

- Carbon Capture & Sequestration
- Decarbonization Electrification
- Industrial Heaters

Partners

Serving Canada and Beyond for 50+ Years.
